

FEEDBACK ON GLOBAL SURVEY PART 2

Laura Merner

Goals of this session

- Evaluate the entire questionnaire to make sure that it works across the region and for all disciplines.
- Working in small groups, arrive at a consensus for suggesting changes. Changes must be useable for the entire region and by all disciplines.
- Every group's suggestions will be given serious consideration.

Task for today

- In small groups, discuss each section of the questionnaire. 10-15 minutes per section.
 - Do the questions work across the region and in all disciplines?
 - Do they all support the research questions?
 - Do you see any gaps?
 - However, it is already too long (176 answers). If we add something new, something old should be removed.
- Please take notes in English. We will review all notes.
- Groups will report back with their results.

Questionnaire sections

- Section 1: questions 1-22
- Section 2: questions 23-40
- Section 3: questions 41-50
- Section 4: questions 60-76

Research Questions

Goal: Better knowledge of the gender gap in science around the world

- Comparisons across
 - regions,
 - countries,
 - disciplines,
 - level of economic development of the country (Human Development Index)
 - sector of employment (academia, industry, school),
 - age (younger and older respondents),
 - attempt to explore trends in time (best to conduct survey again)
- scientists' development of interest in science,
- experiences in education and careers,
- work-life balance,
- family support,
- Demographics,
- access to resources needed to conduct science, and
- opportunities to contribute to the scientific enterprise

Goal for next session

- Discuss how you can participate in the dissemination of the questionnaire.
- Thank you for your participation! Your feedback is very important to the success of this survey!
